

## Year 5 Bingo Homework Summer 1

Alongside your daily reading, spelling and times table practise (Times Table Rock Stars or timestables.co.uk) please work through the following additional homework tasks. House points will be awarded each time a piece is completed.

### Start...

Using the knowledge we built up from our SUFC sessions, create your own exercise plan. Write down a range of different exercises with how many reps of each. Measure your resting heart rate, record it. Complete your exercise and log. Measure your finishing heart rate and record. What was the difference? Stay hydrated! Now get someone at home to try out your plan.

Prepare and cook traditional Anglo Saxon- foods such as mushroom soup, honey, oat and spice cakes or summer fruit, honey and hazelnut crumble. If you choose this, you must have adult supervision! Take photo evidence.

After that, write a set of instructions, including imperative verbs and bullet points. Can you add in your budget with costings for what you could sell your item for, based on how much it cost you to buy the ingredients and the time it took to prepare and make?

Research an Anglo Saxon god of your choice and create a poster or presentation about them. Include a detailed description about them using expanded noun phrases and parenthesis, as well as a clear illustration.

Using your knowledge from our learning in the spring term, can you use PowerPoint to create your own game? (Let us know if you want to do this in school.) Plan an adventure, plan out the route, what the choices will be and where it will take them. Any special features or characters.

This half term we are focusing on E-safety. Using ICT can you create a poster for the Key Stage 1 children explaining what we mean by e-safety. Make sure you give some examples of how to be safe in a few scenarios. Add pictures to make it reader friendly. Email it into the office!

Research what the 10 largest countries are and what is their population. Order these in ascending order. Can you use your rounding knowledge to round each population to the nearest 100?

Draw a symmetrical Anglo-Saxon long house. Then alongside this, create five mathematical word problems linked to Anglo-Saxons. Can you make it to scale and add measurements? Could you now use recyclable materials to construct?

Research and document, in detail, facts about a significant figure from history of your choice. Add as many interesting facts as possible and images to support your findings. Present it as creatively as possible.

Make an Anglo-Saxon longhouse using any materials you have at home. You may need to research their appearance/structure beforehand. Include your plans with your final piece.

Go on a walk to the beach or use your memory from the year 5 Beach Clean. Can you draw a detailed picture of our coast? Can you include the beach, sea, sea wall and even the beach huts?

### ...Finish

It's presentation time! Collect all your favourite pieces of homework from this term and present them to the rest of the year group. You could make this into a collage!
